

Newsletter...Utilities

Safety Technology Ltd currently supplies to numerous utility companies including: Central Networks e-on, Scottish and Southern, United Utilities, YEDL, EDF and many more.

With safety, strength and ultimately comfort being the main priority, the STL 870 C-09 harness has been designed specifically to meet the needs of those working in the Power, Telecommunications and Wind Energy Industry, complies with: EN 361, EN 358, EN 813

STL 870 C-09

Safety Technology is the major provider of safe working and rescue training when working at height. In March we will be moving to new and larger premises to provide an even better training service with in house climbing structure, teaching rooms. On-site training locations include Spain, Denmark, Portugal, India and many more.

Our safety equipment can be seen on our website www.safetytechnology.co.uk and orders can be placed via e-mail to info@safetytechnology.co.uk or call 01291 691123.

The product on the left highlights the 1217 toolbag. It is a Material pocket made from nylon with bellows-type sides for greater capacity. It features holders for four tools and a flap with velcro locking.

The product on the right shows the 1218 toolbag that has slightly bigger dimensions than the 1217: 290x245x120

1217
